

Welcome

NATURE INSPIRED SPACES FOR GROWING MINDS

LSG is a family owned and operated company located at Redwood Valley in the beautiful Nelson Tasman region. Formed in 2006 by the Woodman brothers; LSG has developed over the past 18 years, from producing furniture for Early Years into a full design and installation service for schools – transforming educational environments.

We specialize in creating sustainable, high-quality furniture that transforms educational spaces. Our NZ-made products are designed to foster better learning outcomes and adapt to the evolving needs of schools.

WE OFFER A HUGE RANGE OF SERVICES

Our comprehensive services cater to every aspect of your furnishing needs within New Zealand.

From personalized consultations to MOE application support and pre-grant financial assistance, we guide you through every step. Our design expertise extends to custom pieces, backed by detailed itemized quoting, 3D walk-throughs, and 2D floor plans. With a commitment to excellence, we oversee project management from scheduling to full installation, ensuring seamless execution. Our reach extends globally, offering worldwide shipping and partnering with distributors in select countries. Professional media services capture the essence of your space through video and photography.

Plus, our lifetime service agreements guarantee the longevity of our installations, providing peace of mind for years to come.

ENVIRONMENTS AND TEAMS WE PARTNER WITH

WHY DOES **IT MATTER?**

NOT ALL MATERIALS ARE CREATED EQUAL.

While some materials are sustainably sourced real timber, most schools suppliers offer engineered wood.

This engineered wood is a mix of sawdust, wood fibers, industrial waste, toxic bonding agents, and formaldehyde. These materials, known as particle board and MDF, are essentially the 'junk food of the furniture world.'

THERE IS A BETTER OPTION... **BIRCH PLYWOOD!!**

Birch plywood is environmentally friendly, made from thin birch veneer layers with non-toxic adhesives. It's durable, with a 35 year lifespan, and is sourced from sustainable forests

MDF AND PARTICLE BOARD: **UNSUSTAINABLE AND UNRELIABLE**

MDF and particle board lack durability, are moisture-sensitive, have shorter lifespans, and easily break or deform under stress.

MDF and Particle Boards production, usage, and disposal cause deforestation, pollution, emissions, and health risks. Adopting sustainable alternatives like Birchwood ply is essential to mitigate these effects.

- Low durability
- Prone to moisture damage
- Requires frequent replacement
- Poor screw holding capacity
- Deforms under stress
- Releases VOCs

- Prone to chipping
- Limited design **Flexibility**

WHAT MAKES **BIRCH PLYWOOD SUPERIOR?**

DURABILITY AND STRENGTH

Birchwood ply is significantly stronger more durable than MDF and particle board. It will not only last longer but it's ideal for high-use environments.

MOISTURE RESITANCE

Unlike MDF and particle board, Birch plywood resists moisture. Reducing the risk of swelling, warping, and structural damage over time.

ECO-FRIENDLINESS

Sourced from sustainable forests, Birch plywood has a lower environmental impact and doesn't emit harmful chemicals like MDF and particle board.

RESEARCH FOR YOURSELF

Not sure if you believe us? Go on, unleash your inner detective and dive into the mysterious worlds of Birchwood Ply, MDF, and Particle Board.

THE LSG DIFFERENCE

We specialise in educational spaces inspired by nature. That not only don't cost the earth, but take care of it too.

YOU DREAM IT, WE'LL BUILD IT

Do you possess a spark of inspiration? We possess the magic to bring it to life. Our plywood transcends the limitations of lesser materials and design constraints.

KAITIAKITANGA

We take great pride in working with natural and sustainable materials. We do everything in our power to act as guardians of our environment.

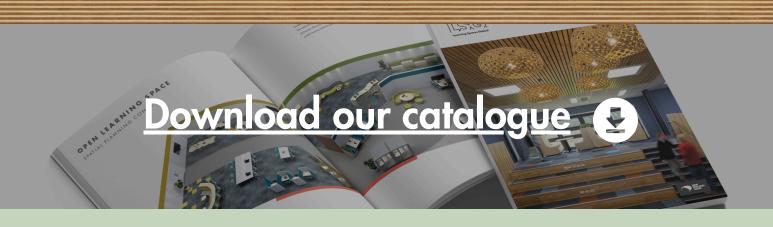

NEED IT FAST

Our standard lead times are a super quick 2 - 4 weeks. If you're in a tight spot and need something quick, we'll work with you to get it to you fast

"Even the Prime Minister and our local MP Judith Collins praised the beautiful furniture"

We were looking for a space that fosters safety and warmth, a welcoming environment that encourages connection and comfort for students. Natural materials and thoughtful design that reflects for desire for a nurturing and inspiring educational setting. LSG fulfilled all these needs, providing a thoughtfully designed learning space that prioritized safety and warmth. Of course with natural materials and color schemes creating that inviting atmosphere. The 3D video walkthrough to allow collaborative planning,

LISA CAVANAGH,
PRINCIPAL

Ngākōroa Primary School

the nurturing environment that we needed.

ensuring any final furniture choices aligned with
