THINK OUTSIDE THE CLASS

ABOUT OUTCLASS

Outclass innovation was born from a desire to improve the learning experience for all children, particularly those with neurodiversity, trauma, and unique learning needs. With 15 years of experience in the education sector, designing and innovating learning spaces in early education and schools throughout New Zealand, I observed a critical need for something altogether different to combat the growing issues faced on a daily basis.

My passion for outdoor learning and open-ended environments led us to envision a solution: a relocatable hub that could be easily integrated into any outdoor learning environment, providing an alternative to traditional classrooms.

Addressing a Growing Need

Recognising the increasing prevalence of neurodiversity and the challenges schools face in supporting these learners, I sought to create spaces that foster calm and reduce anxiety. Outclass Hubs offer a haven for students who may struggle in traditional classroom settings, providing a quiet and engaging alternative to re-regulate and engage a closer connection with the natural environment around us.

A Vision for the Future

Since its inception in mid 24, Outclass Hubs has garnered significant interest from the education sector. We have collaborated closely with the Ministry of Education, receiving valuable feedback on the quality and potential impact of our hubs.

The Outclass Difference

- **Innovative Design:** The first and only relocatable hub designed specifically for schools.
- **Focus on Wellbeing:** Creating safe and engaging spaces that support the diverse needs of all learners.
- **Addressing Space Constraints:** Offering a practical solution to the challenges of limited school space.
- **Outdoor Learning:** Fostering a connection with nature and promoting active learning.

Join us in revolutionising the learning landscape for the tamariki of Aotearoa.

Kurt Woodman
Managing Director, Outclass Hubs

The Outclass Retreat Procurement Process

1. **DISCOVERY CALL** - Work with you to learn about your current needs and requirements, to enable us to come up with the best solution for you.
2. **FUNDING REVIEW** - Discuss how funding will be managed to enable the purchase of your outclass hub. We offer tailored sponsorship templates as well as funding specialists to assist you all the way.
3. **SITE VISIT** - Our team works with you to plan positioning and access to ensure the delivery and installation process runs smoothly
4. **OFF-SITE MANUFACTURE** - We build your Outclass in one of our factories and work with you throughout the delivery and installation process.
5. **DELIVERY AND INSTALLATION** - Our team arranges pre-delivery foundation prep, and then follows with the delivery of your Outclass hub.
6. **OPEN DAY** - We encourage a creative and fun 'grand opening' of your new Outclass facility, boosting student engagement and appreciation as well as promoting those who have helped through donations, sponsors, etc.

"We believe every student deserves a learning environment that supports their unique needs. What is the solution to all this? Think outside the class!"

— K Woodman - Outclass Founder

OUTCLASS
OUTDOOR LEARNING ENVIRONMENTS

OLE RETREAT 6 X 3

OLE Retreat 6 x 3 with intergrated deck

The Outclass 6 x 3 retreat is one of our most versatile OLE hubs with full length decking included. Your choice of fully opening Bi-fold doors or a roller door for added security, this unit is fully lined inside with plywood, or your choice of lining, A selection of commercial grade carpet tiles or hard-wearing vinyl for easy maintenance and a retractable awning for extra shade in the summer months.

Catagorised as a 'storage facility' for outdoor learning environments, in most cases there is no building consent required for this Hub. Speak with us today to discuss your requirements and learn how other schools are using these spaces. Delivery between 6-8 weeks.

\$85,000 +gst Including Delivery *

Screw piles are recommended for the foundation unless placed on a concrete slab. Screw pile installer contracts directly with you to arrange foundation preparation. DELIVERY PROCESS

In 4 simple steps, your students and educators can be enjoying the new Outclass retreat within 24 hours of delivery.

Prepare Site

Prepare site to ensure basically level and ensure there is sufficient access for a Hiab truck with crane for delivery and lift off. The access points need to be at least 3.5mt in width and the ground hard enough to take a truck driving on it. Grass fields etc are mostly OK unless after long periods of wet weather or with poor drainage areas. Always consider your options, some sites are better to lift over the boundary fence from neighbouring property. If you are unsure, we recommend contacting us for a site visit.

Arrange Screw Piles

Arrange Screw Piles - Unless your Outclass is going directly on to flat concrete, we recommend screw piles as a fast and effective foundation method. This is carried out by an external contractor of your choice and this contractor will work directly with your school to ensure health and safety is managed effectively. We have contacts NZ wide which we can recommend.

Delivery

Arrange Delivery - Once we get the thumbs up, we can arrange for delivery of your Outclass at a time that best suits you. The Outclass is lifted onto the prepared foundations, and the decking is swung down into place. Once anchored to the piles, the Outclass is completed and ready to use immediately. If you have selected a fully consented space, council sign-off and consents will need to be processed before use. Our project team can help you through this process.

Furnish

Furnish - The Outclass is yours to furnish accordingly. We offer furnishing packages to suit each purpose including custom pieces. Involve the students in designing landscaping around your new masterpiece.

CONTACT US
