ABOUT LEARNING SPACES GLOBAL

Our vision

To create excellence in learning environments to nurture and stimulate success in every child.

- LSG designs and manufactures an extensive range of **naturally inspired timber furniture** for both indoor and outdoor learning environments.
- Proudly **family-owned and operated** since 2006, LSG is based in Redwood Valley, Nelson-Tasman, New Zealand.
- While visitors are welcome at the Redwood Valley location, LSG also offers the convenience of an **Auckland-based sales and service team**, providing support for new centre designs nationwide.
- All LSG products are backed by a '**Lifetime Service Guarantee**', ensuring long-term value and reliability.
- LSG's industry-leading furniture, crafted from **natural timber**, is purposefully designed to foster a **calm, welcoming, and enriching learning environment**.
- The **open framework** of LSG's furniture promotes **optimal airflow** and enhances spaces with **natural light**, creating a healthier and more inspiring learning atmosphere.
- All furniture is **delivered fully assembled**, ensuring a seamless and hassle-free setup experience.
- We manufacture our premium furniture in our Redwood Valley factory from **FSC and CARB 2 certified** European Birch Plywood panel

Our mission

Provide the education sector with furniture designed and constructed using cutting-edge innovations and trends that facilitate Educators and Children to get the best out of every day.

WHAT WE DO

1. Consult with you, staff and other designers

2. Room planning design to optimise your centre

3. Produce and promptly deliver nationwide

4. Full on-site installation and after sales backup

5. Support through to MOE approval

6. Help capacity fulfilment through a desirable centre

LSG ROOM PLANNING

Enhance your next project with Learning Spaces Global: ☒ Beautifully-furnished 3D renders ☒ Itemised 2D floor plan ☒ Budgeted quotation

In the good old days, anyone handy with a hammer could find the time to knock up some children's furniture. We transcend this willing attitude with a love of developing quality furniture created for today's modern learning environments. Market-leading features, carefully selected materials, forward-thinking design and first-class customer care, allow us to build premium, made to order furniture for your brand new centre direct to you from our Nelson workshop.

A well-planned furniture layout provides optimum learning space functionality within budget and time constraints. We maximise storage efficiency, visibility for supervision and 'elbow' room for cohesive flow. From your architecturally designed floor plans, we will create beautiful 3D renders for you to visualise your learning centre fully furnished and ready for its open day.

NATURAL DESIGN

DESCRIBED AS THE FUTURE OF DESIGN

Natural design (bringing the outdoors in) has been proven to reduce stress, enhance creativity and clarity of thought and improve our wellbeing. By incorporating natural elements teachers and students alike gain head space and feel like they have their own place to settle, explore and be creative. This has endless benefits as it gives teachers the opportunity to build stronger relationships with students, gifting the students with optimal learning experiences daily. Nature itself is an essential aspect of a student's learning and development from day one, as it is inborn in our beings. Our environment delivers physical and memorable experiences that nothing else can. LSG provides that missing link between nature and educational environments stimulating positive effects on development, health, and well-being. Psychologists have even found that simply adding plants to your space can increase well-being by 47%, creativity by 45%, and workplace productivity by 38%.

WHAT THEY SAY

The Willows, Christchurch

"We look for things that would suit our design, aesthetically pleasing, safe and durable and would stand the test of time. We needed to create great spaces for the children, things that we could move around and change, that was still light and natural. Its been fantastic and we get lots of compliments on the furniture. I've dealt with Grocare for many years, and I always find the service is amazing, the product has always been a great product, that has always lasted. Any issues we've got, they're really quick to resolve these, and they are open to any ideas, and keen to create new things."

Melissa Hempstalk, Centre Manager,
The Willows

MilliDale Explorers, Auckland

"At MilliDale Explorers, we opened our full center in August 2022, designed and built with immense love and care. For this significant project, we partnered with Learning Spaces Global, having previously collaborated with them on three other centers. After meeting with various suppliers, it became clear that Learning Space Global's vision and innovative products were unmatched."

Their products are highly durable, functional, versatile and exceeded our expectations, and the feedback has been overwhelmingly positive. During our open day, parents were amazed by the beauty of the centre and couldn't stop praising the unique pieces.

I wholeheartedly recommend Learning Spaces Global. Their commitment to customer relationships and ability to deliver innovative, high-quality products make them my preferred supplier. For anyone seeking the best in early learning environments, Learning Spaces Global is the clear choice."

Sonya Page, Director at MilliDale Explorers

The background image shows a modern building with a green roof covered in tall grass. Large glass windows reveal an interior space with wooden furniture and toys. The building is surrounded by dense greenery, including a large palm tree in the foreground. The overall atmosphere is natural and sustainable.

Learning Spaces Global cares about the environment and the atmosphere our children grow up in. We also understand the need to ensure our furniture is equipped to withstand the day-to-day demands of early-education centres, kindergartens and schools.

Materials are carefully selected, checked and processed. We use real wood from sustainable forestry to improve the quality of life by creating a healthier room climate! We want you to enjoy our furniture for a very long time in your facility. That is why we select our raw materials very carefully and only use the highest quality materials.

**FURNITURE THAT RESPECTS LEARNING,
CHILDREN AND THEIR ENVIRONMENT**

Natural: Furniture made with Birch plywood has a distinctive character. Just like every tree, every layer of veneer is a unique piece of nature.

Engineered Strength: Our famous 2 in 1 Poppet chair design combines with nine layers of cross laminated veneer (plywood) for a 1,000kg load rating as a stool!

Sustainable: The majority of our timber furniture is made with FSC and CARB 2 certified timber*. It's protected with a low VOC (child friendly), ultra-violet finish to ensure it lasts in a commercial environment.

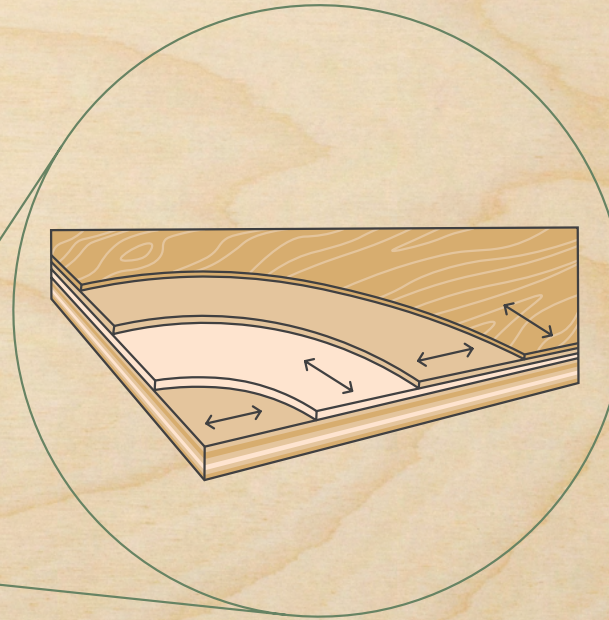

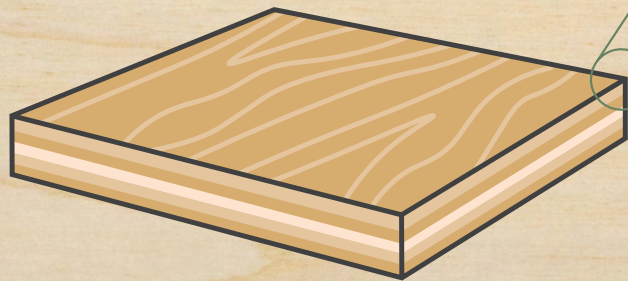

* 100% of furniture made from European Birch Plywood is FSC certified. Learning Spaces Global is committed to improving its environmental accountability and growth towards all of our timber furniture being FSC certified.

BIRCH PLYWOOD IS THE FUTURE

European birch plywood is made by bonding layers of birch veneer together with adhesive.

The layers are stacked with their wood grains alternating at right angles, providing excellent strength and stability.

High-quality adhesive, WBP glue (water and boil proof glue). These adhesives ensure strong bonding suitable for various demanding applications.

European birch plywood is valued for its durability, smooth surface, and attractive appearance. Perfect for that high-quality finish and reliable performance.

- Birch plywood is environmentally friendly, made from thin birch veneer layers with non-toxic adhesives. It's durable, with a 35 year lifespan, and is sourced from sustainable forests
- Birchwood ply is significantly stronger more durable than MDF and particle board. It will not only last longer but it's ideal for high-use environments.
- Unlike MDF and particle board, Birch plywood resists moisture. Reducing the risk of swelling, warping, and structural damage over time.
- Sourced from sustainable forests, Birch plywood has a lower environmental impact and doesn't emit harmful chemicals like MDF and particle board.

WATCH ME

True value

Anyone can beat a price, but our attention to detail, selection of high-quality materials and finishes is matchless. Therefore our products last longer, ensuring any extra investment - if any - pays for itself. That's true value for all forward thinkers.

Reliability

Our strict emphasis on quality comes with reliability as a built-in bonus. We understand the rigours of everyday life in early education, so we can proudly guarantee you won't be disappointed.

No assembly

Most furniture is delivered to you professionally assembled unless stated*. There's nothing like unwrapping something that's right ready to use in your centre.

WHY CHOOSE LEARNING SPACES GLOBAL?

Natural timber

Creates a calm, warm and inviting atmosphere for the best learning experience for all ages.

We're relationship builders too

The relationships we build with our clients prove why we have so many repeat customers. We love to support you to create your dream learning spaces, which help your centre to achieve full capacity by creating a highly desirable look that paying parents expect. Our lifetime service guarantee offers you peace of mind and guaranteed care.

Designed by LSG

You can rely on us to bring you leading-edge design trends from around the globe with our experienced design team and industry connections in many countries. We are working on exciting new designs behind the scenes all the time, so stay tuned. We get loads of design problems to solve sent in from people like you too! So get in touch next time you have a light bulb moment.

Elevate your learning environment with our customizable, NZ-made Birch Plywood furniture range. We also specialize in designing and crafting bespoke pieces that embody your vision, culture, values, colors, and logo.

Finished to match our natural wooden storage range. Topped with a scratch resistant, easy to clean high pressure laminate. Our tried and tested table range is designed to both look great and withstand the hardships of everyday early education use. Available to order in a variety of four heights to suit ages six months to five years plus.

Tables

Round Top Kaha Tables

1200 round size shown with silver legs and Natura chairs.

Kidney Top Kaha Tables

i See ordering options below

“The kidney table shape is a great option for encouraging interaction between carer and child.”

1200 x 800 size shown with silver legs, birch top and Poppet chairs

1800 x 900 size shown with silver legs, Birch HPL top.

“We totally love our new tables and chairs. They are very well suited to the classroom environment including providing a comfortable workspace for each student. The service was excellent - as usual and I definitely would recommend Learning Spaces Global to any school/ECE service when looking for quality furniture.”

Note: Seat number depends on chair type

Kaha Splash Table

Enhance student collaboration and classroom aesthetics with the Splash Table. Its unique cutouts create personal workspaces that foster group interaction, while the curved, modern design offers a welcoming alternative to traditional straight-line furniture. Made from durable Birch Ply HPL and supported by easy-to-clean Kaha legs, it ensures long-lasting performance.

Features

- Modern Silver Square Leg System
- Solid Birch Ply Table Top
- Multiple heights available

17907-LSG Kaha Splash Table Birch Plywood

Splash Lego Table

The Splash lego table features compartments in the centre of the table for the children's lego, pencils or whatever resource you wish. The table cutouts provide each child with a more personal workspace, ideal to encourage collaboration in group tasks. The modern design featuring curves softens the classroom and adds a more homely touch when compared to the traditional classroom of straight lines.

Features

- Modern Silver Square Leg System
- Solid Birch Ply Table Top
- Multiple heights available

14997-LSG Splash Lego Table Birch Plywood

14997-LSG Splash Lego Table White HPL

Clover Table

The Clover Table is perfect for kai or art areas, adding charm and functionality to your space. Crafted from solid Birch plywood, it offers exceptional durability and has been tried and tested in early years environments to ensure long-lasting performance.

Features

- Modern Silver Square Leg System
- Solid Birch Ply Table Top
- Multiple heights available

Tablet Station

A modern, ergonomic solution for children's learning and play activities, featuring adjustable seating and easy supervision.

The Tablet Station provides a designated zone for children's learning and play, ensuring proper posture with ergonomic seating. Part of the Learningcurve range by Learning Spaces Global, it includes two versatile grand poppet chairs that can also function as stools for both children and adults.

Features

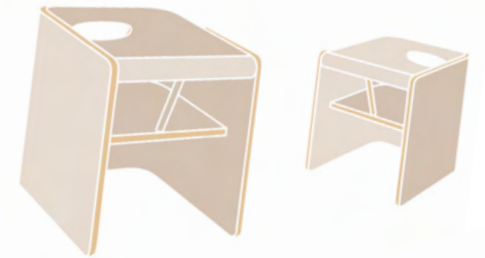

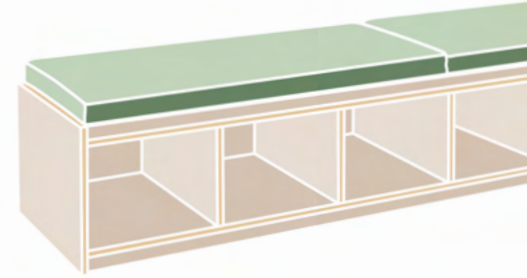

- Natural birch ply
- Comes complete with two Grand Poppet Chairs
- Modular design matches our Learningcurve storage range

Order# 146350-Poppet
146350-Without-Poppet

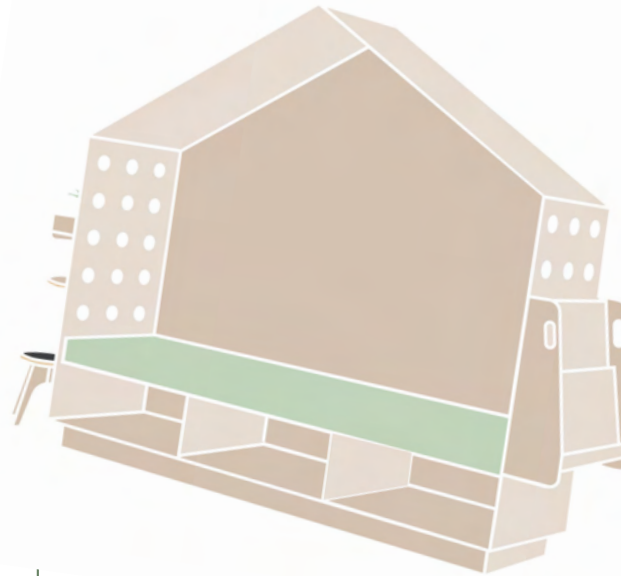

Shown with 2x Grand Poppet Chairs

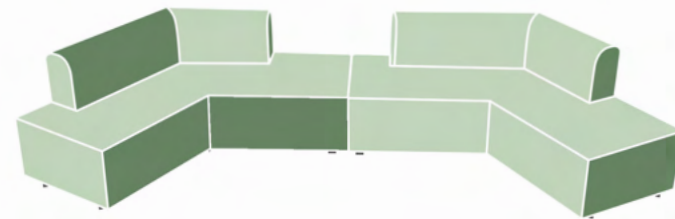

Our seating range focuses on correct posture support which in turn produces comfort and contentment. If children have furniture shaped to support their bodies' best position, they can stay focused on the work or activity in front of them. Solid timber, plastic and vinyl options to suit every taste and style.

Chairs, Stools, Sofas, Cushions and Squabs

Seating

Chair size guide *"matching our tables and chairs has never been easier"*

Choosing the correct seat height for the age of the children ensures they are seated as safely and as ergonomically-comfortable as possible during their first years of learning to sit up - at tables and chairs designed especially for them. Pairing the right chair and table combination is also important to provide just the right amount of leg clearance, as too big of a gap will impact their ability to perform activities efficiently.

Poppet Chair

"the original infant multi-chair with gentle curves crafted from premium timber"

"We decided to give the new poppet chairs a go as we were looking for something a bit more robust and easy for the children to get into by themselves. The poppet chair meets these requirements and the children love them! It is great how the teachers can turn them on their sides and use them to sit on while we are feeding the children."

Model / Size	Dimensions	Order#

- Large storage shelves hold up to 6 baskets or tote-trays
- Squab seat cushion included in a choice of five colours
- Delivered professionally made.

Acoustic Learning Tree

Enhance your space, create an amazing place for people to study, learn and feel safe.

This perfectly designed and crafted Acoustic Tree is exactly what you need for your Students and Teachers to feel the power of Nature indoors. With the flowing curves to the Acoustic leaves, this free-standing Tree creates a calming and safe place for the imagination to flourish.

i Available in Quarter, Half, 3 Quarter and full configurations

Established Learning and wellness benefits include;

Biophilic Tree design brings the outdoors indoors to enhance the natural learning environment and helps children connect with our natural surroundings.

Reduces harsh noises from reverberation around the large open spaces, ideal for quiet zones, ILE areas, libraries, and collaboration spaces.

Woven to precise specifications with high abrasion standards, repels stains for easy clean, highly durable, heavy commercial rub resistant fabric. Fire rated to AS/NZS 15-30.3

This tree comes with our most popular BEECH LEAVES in a soft green acoustic foam. But ask our team if you wish to customise these leaves to suit your own learning theme.

Promotes collaboration, togetherness and unity, and provides a 'Go to place' for those needing support.

Encourages a greater sense of wellness and calmness amidst overstimulated environments and spaces.

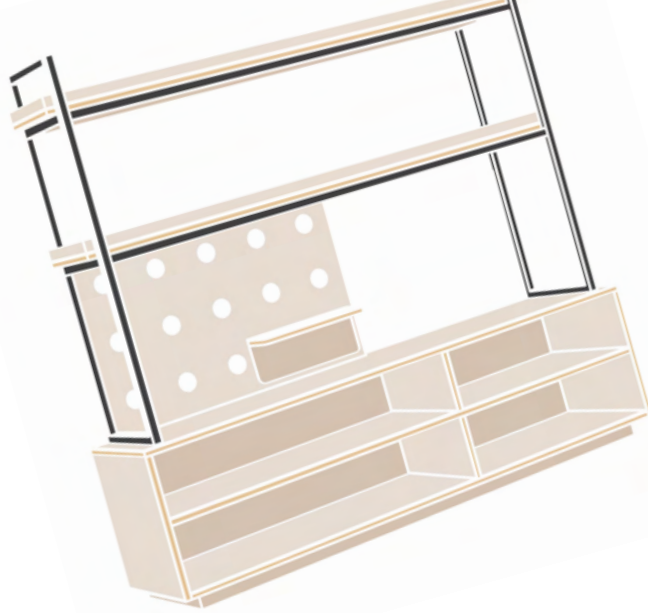

Increases warmth and natural atmosphere in learning spaces to help children feel more inclusive.

Strong and Durable European birch plywood construction, perfect for high-use environments

Classroom efficiency and flexibility is paramount to the design of the Learning Spaces Global storage and shelving range. Feature-rich designs made with high-quality materials throughout and close attention to detail. Safety and functionality combine to give more storage capacity using as little floor space as possible. Natural beauty engineered to enhance the value of any classroom for children, parents and teachers alike. Easily create learning spaces for popular areas such as blocks, music, books and puzzles from these practical modular designs.

Storage + Display

You are free to create the space you need when you need it

With our premium Learningcurve range you'll never get stuck with the same, tired old furniture layout again. Changes to age group, area zone or larger roles are no problem for the modular storage and shelving system. Modify your furniture layout how you need it, whenever you choose. Mobile units

on wheels make changing from wall or island configurations a breeze. See samples of different layouts using the same furniture pictured on left and below; showcased in our latest white high pressure laminate (HPL) with European birch plywood photography shoot.

Our range of storage furniture is packed full of features and benefits. Smart design combined with high-quality materials and engineering ensures you are investing in market-leading storage furniture.

LSG STORAGE SHELVING FEATURES AND BENEFITS TO YOUR CLASSROOM

New activity tray tops!

Choice of a traditional flat top or our new tray top, designed for activities or extra storage trays or baskets.

Get right up close

Large castor wheels let children get closer to this unit and cater for easy changes to your classroom layout.

No assembly required

This item is professionally assembled by Learning Spaces Global and arrives to your door ready to go.

European birch ply

Crafted from sustainably sourced solid European birch ply for a premium natural look and feel.

Gentle curves

Beautiful flowing curves replace sharp-corners and enhance any classroom!

Durable UV finish

Finished with a high quality environmentally friendly UV coating for premium protection.

The perfect height

Furniture designed at three specific heights to suit every age group.

Modular design

Mix and match units to create your own learning spaces. Side-by-side on walls or together as 'islands'.

Engineered stability

Learningcurve units are incredibly well built. With a lower centre of gravity!

High pressure laminate (HPL)

Optional ultra durable layer of white High pressure laminate (HPL) is added on top of our standard European birch plywood.

Storage Partition Units

With Open Display Shelving

Our all-new stylish open shelving with its clean lines, black steel frames and natural timber harmony, is the perfect way to create that 'wow' look you need in your learning spaces. Made with the same quality promise LSG brings with all of our products, you can be assured you are making the right choice. Customised panel colours and options are available to suit your interior design.

Features

Our design flare excels in this area, providing you with vast choices of quality solid timber furniture to meet the demands of active play. With hours of time spent in dramatic play and gross motor, you will be pleased to know our range has got it covered.

Feature-Packed, Specialised Designs

Dramatic Play

Learningcurve Home Corner Role-Play Range

"I looked around for a kitchen set bearing in mind what I see everyday. The features that were outstanding for me were the fact that children could stand around the stove structure. It could be against the wall but it could also be in an island setting. The height was multi-age. I was not going to purchase the fridge but I noticed our children like packing things away into shelves and cabinets. With the fridge, they can be upright as they do that. Thank you for all those foresights and great features."

145301 Kitchen Station with oven, stovetop and sink.

Features

- Pretend play hotplates and knobs
- Oven with 'hot' yellow display window and removable oven rack
- Stainless steel sink and tap with large storage cupboard underneath

Gross Motor Range

Touch and feel the varied shapes and surfaces. Crawl up and down, through and around. Pull yourself up and coast around. Start climbing and learn about your self-awareness in challenging environments. Master your sense of balance...

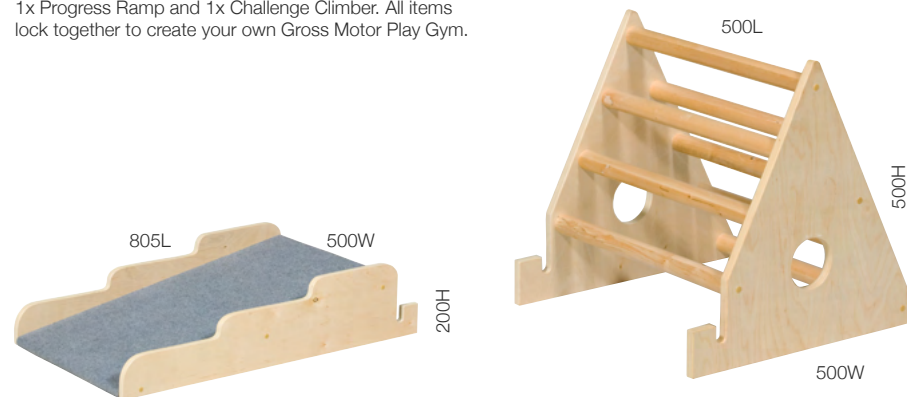

Features

- Solid birch ply timber with UV finish
- Heavy duty design, premium look and feel
- All items lock together
- Encourages progressive learning
- Smooth shaped edges to encourage children to touch and feel the different heights and angles as they play

08503 Gross Motor Play Gym Set.

Four piece Infant crawl ramp set for gross motor activities. Set includes 1x Platform, 1x Carpeted Ramp, 1x Progress Ramp and 1x Challenge Climber. All items lock together to create your own Gross Motor Play Gym.

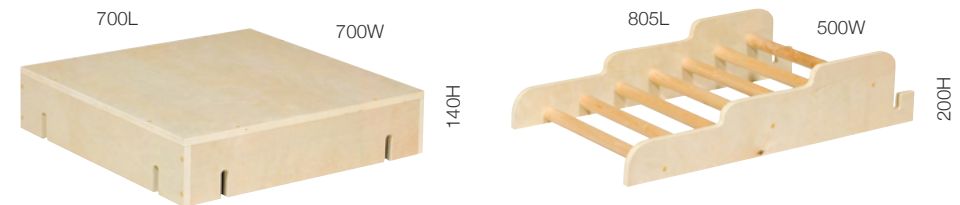

08117 Carpet Ramp.

Carpeted infant crawl ramp for gross motor activities. Attaches to platform to create your own play set.

08119 Challenge Climber.

Triangle challenge climbing frame ideal for gross motor activities in your infants room. Locks into platform to create your own gross motor play set. Bring your play gym to another level.

08118 Platform.

Solid birch ply timber platform to connect other gross motor accessories to.

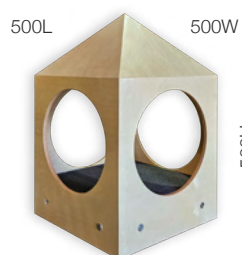

08116 Progress Dowel Ramp.

Connects onto platform or tunnel. Children learn different textures, shapes, slopes, heights and angles as they explore this ramp.

Gross Motor Set - Magnetic

Gross motor play gym pack of 5. Set includes 1 x platform, 1 x carpeted ramp, 1 x hill platform, 1 x burrow and 1 x challenge climber. All items lock together with magnets to create your own gross motor play set and reconfigure as you like in your room.

Made in NZ from Birch Ply timber these feature a super user-friendly magnetic connecting system complete with smooth edges to encourage children to touch and feel the different heights and angles as they play.

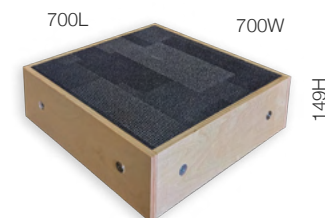

23113-7 Gross Motor Burrow Tunnel
Infant crawl tunnel for gross motor activities. Connects magnetically to other pieces for a custom playset.

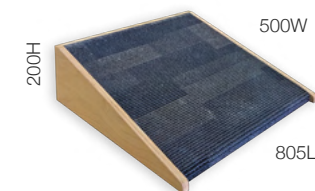

23111-7 Gross Motor Carpet Hill
Solid Birch Ply carpet hill connects to other gross motor accessories, allowing for a play set customized to you.

23115-7 Gross Motor Challenge Climber
A triangle frame for gross motor play in your baby's room. Connects with other pieces for customization.

23110-7 Gross Motor Carpet Platform
Solid Birch Ply carpet platform connects to other gross motor accessories, allowing you to create your perfect set.

23114-7 Gross Motor Carpet Ramp
Infant crawl ramp for gross motor activities. Connects to other pieces for multiple arrangements.

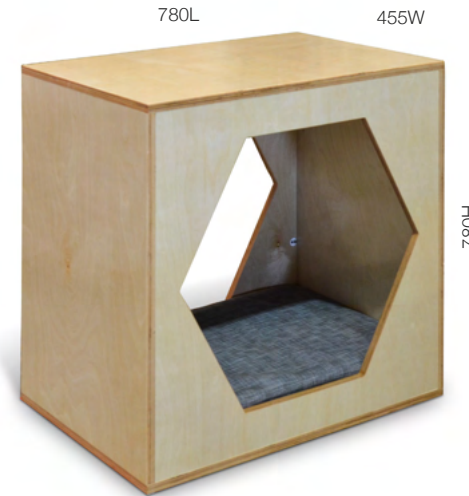

Shape Escape

Infant or Toddler Shape Escape. The perfect hideaway for little ones! Designed with their needs in mind, this cozy space is big enough for sitting, playing, reading, or crawling through like a tunnel.

Its open, yet enclosed design provides an opportunity for children to experience the spatial boundaries of closed spaces without feeling trapped, offering both safety and freedom.

Features

- Solid birch ply timber with UV finish
- Provides a safe space for children
- Smooth shaped edges
- Available in Birch or White HPL

14903-LSG Hexagon Shape Escape.

Encourages children to touch and feel the different heights and angles as they play.

14902-7 Square Shape Escape.

The Shape Escape helps children develop motor skills as they climb, crawl, and maneuver around the structure.

14901-LSG Circle Shape Escape.

Shape Escape with squab, ideal for gross motor activities in your infant's room.

House Hideaway

Meet the House Hideaway – a cozy retreat for children to break away from the busy classroom environment. With its charming, house-like design, it offers a warm and inviting atmosphere that feels like home. Plus, its adorable appearance makes it a gorgeous addition to any space!

Features

- Solid birch ply timber with UV finish
- Provides a safe space for children
- Smooth shaped edges
- Available in all HPL colours

Hexagon Platforms

Hexagon-shaped platforms with a carpeted top—versatile and functional for any classroom. Perfect as multipurpose risers, they can be used for resource displays, block play, or as climbing structures to encourage physical activity and cognitive growth.

Available in two heights, these platforms are designed to be used individually or combined for added functionality and versatility.

Features

- Solid birch ply timber with UV finish
- Heavy duty design, premium look and feel
- Smooth shaped edges
- Available in all HPL colours

22001 Hexagon Platform low.

Perfect for younger children and can also be paired with the high riser as a stepping stone, encouraging safe exploration and gradual skill development.

22002 Hexagon Platform High

This modular platform offers endless possibilities for classroom use. Versatile and practical, it can be used on its own or combined with others to enhance functionality and adapt to your needs.

Shape Escape Hub

The Shape Escape Hub is a versatile and engaging play structure designed for active exploration and imaginative play.

The hub features an integrated crawl-through tunnel that adds an element of adventure, encouraging movement and spatial awareness as well as a place to relax and reset away from the hustle and bustle of the centre. There is ample storage space, perfect for stowing away toys or books helping keep the play area tidy. This interactive hub blends fun, functionality, and creativity, making it an ideal addition to any playroom or activity space.

Features

- Solid birch ply timber
- Safe Space for childrens well-being
- Heavy duty design, premium look and feel
- Smooth shaped edges
- Available in all HPL colours

266217-LSG Shape Escape Large
Provides ample storage with trays and cupboards, making it ideal for any area in the center.

266227-LSG Shape Escape with Puzzle Book Shelves
The perfect hub for your quiet corner, featuring storage for puzzles or books and an integrated tunnel that little ones will adore.

Butterfly Soft Play Climber

Introducing the Butterfly Soft Play Set – a charming fusion of playful design and practical functionality, ideal for any early childhood learning environment.

Designed with both fun and practicality in mind, this set features a delightful butterfly shape that captivates infants while providing a rich sensory and gross motor experience. Constructed from durable, waterproof vinyl, it's built to withstand the rigors of frequent cleaning in educational settings, ensuring safety, hygiene, and endless enjoyment.

- Sensory Experience for Infants
- Natural pastel colours
- Perfect for developing Gross Motor Skills
- Hard wearing vinyl

Infant Room Divider

Infant Room Divider allows easy and effective separation within infant spaces. Separate the walkers from the crawlers or sleepers from nonsleepers. Made from Birch Plywood, this divider looks great and allows easier supervision for the educators.

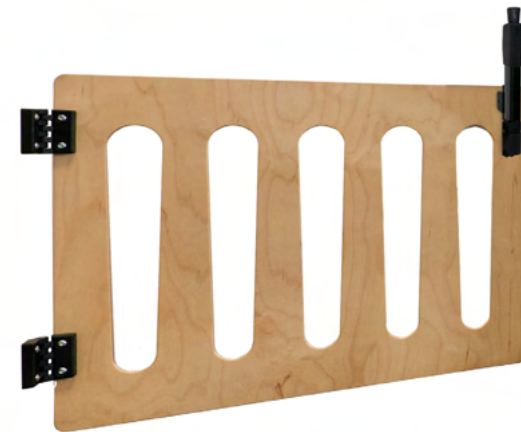

- This is sturdy but easily moveable as you require if you need to section off a different corner of the room.
- Ask us for custom dividers or cultural engravings, as we can custom make to your specifications.

Infant Divider Gate

Divider gate with safety latch allows easy and effective separation within infant spaces. Separate the walkers from the crawlers or sleepers from nonsleepers. Made from Birch Plywood, this gate looks great and allows easier supervision for the educators.

- Easily installed by mounting between 2 of our LSG storage units. Can also be mounted between a wall and a storage unit.
- Ask us for custom size gates, as we can custom make to your specifications.
- 750mm (total gap including hardware)

25 year timber guarantee

Outdorable® weatherproof timber is guaranteed for 25 years not to twist, shrink, warp or rot! It lasts for good - naturally.

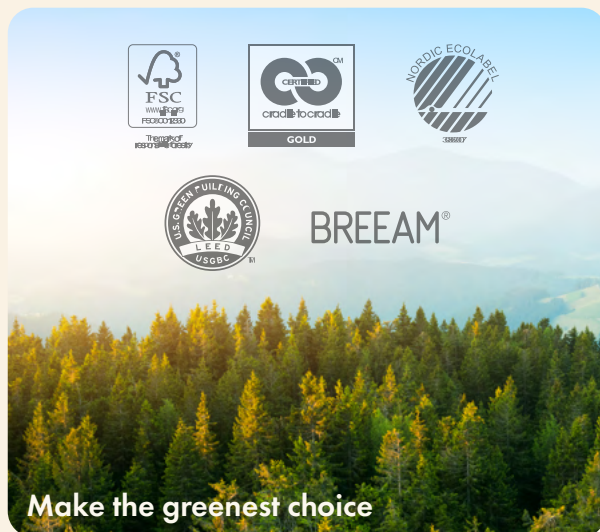

Full safety certification

All Outdorable® play equipment is safety certified for supervised ECE when used accordingly to our user's handbook.

Flexible configurations & creative challenges

Movable play inspires boundless configuration ideas. Create tunnels, hide-outs, bridges, boats and more with our modular Beaverlodge climbers.

Make the greenest choice

Our timber holds all the eco-labels you could ever wish for. Certified: Cradle to Cradle gold level, FSC®, BREEAM and LEED.

Encouraging physical & mental development

Stimulates imaginative play, gross motor skills using upper and lower body strength, hand-eye coordination, balance and spatial awareness.

Looking for outdoor inspiration?

Watch as Outdorable comes to life as children demonstrate the freedom of the great outdoors outdorable.com/video

Real wood. Unreal performance.

Our dedicated team of experienced designer's struck gold with a world-leading modified timber technology process. Accoya® turns fast-growing, sustainable timber such as New Zealand Radiata pine, into stable, non-toxic material with performance guarantees exceeding that of any hardwood or timbers treated with nasty chemicals. Accoya® wood is safe for children and the environment just like untreated wood. Accoya® has unmatched durability and resilience against moisture resulting in weatherproof timber which requires minimal maintenance to withstand the 'splash and bash' rigours of early childhood environments.

Throughout the lifecycle of your playground, resources used in PVC and Aluminium deplete whereas the Radiata pine tree used in Accoya® has regrown and harvested twice. Accoya® has the lowest carbon footprint and is at home in a fully circular economy. C2C Gold Certified: Bio-based, non-toxic, recyclable and based on an infinite, fast-growing resource.

Why is wood the greenest choice?

The manufacturing process of other materials such as PVC, steel and aluminium use non-renewable resources causing an increasingly negative impact on our environment. These materials require significant amounts of energy in manufacturing. In contrast, the production of sustainably sourced wood such as Accoya® is endlessly renewable and only requires a fraction of the energy.

BREEAM®

Outdorable Sand & Water 3 Piece Set

Order# 16508

Recirculating water pump that's hand powered by the children for the most popular water play experience ever.

Recycled river rock water diverters for added water play experience. Looks and feels just like real rock.

Children can spend countless hours playing with water, but wait till you add our new sand and water play set to your water play area. Watch as the children pour water down the slope into the tub. Various water diverters are situated along the way to create added learning experience as they dam up the flow with sticks and rocks and leaves. Adding extra buzz to this set's River Bed is our child-friendly hand water pump. Just attach the pick-up hose provided to the outlet on the water tub, and you've got a recirculating flow of water. The pump is hand-powered by the children for the most popular water play experience ever. Let them fill containers and pour them back into the tub. This large set promotes teamwork and sharing, along with many more positive aspects of development and learning. This standalone unit requires no fixing. Just push up to the other water tables and start playing.

Items included in this package	Code	Qty
A. River Bed	16037	1
B. Double Water Table 600H	16031	1
C. Single Water Table 450H	16030	1

Outdorable Infant Gross Motor 5pc Package

Order# 16511

Items included in this package	Code	Qty
A. Infant Gross Motor Riser 150mmH	16010	2
B. Infant Gross Motor Incline	16015	1
C. Infant Gross Motor Burrow	16016	1
D. Infant Gross Motor Log Crawler	16017	1

Specifically designed for infants from 0-2 years as they learn some of life's most significant skills. Like our other designs, these items are also available as individual pieces. Fully interchangeable to allow creating multiple configurations. All items are interlocking using the same connection slots as our larger Beaverlodge climbing sets. Gross motor skills are critical to enabling children to perform everyday functions, such as walking and running, climbing and catching, throwing and hitting a ball. However, these are also crucial for daily self-care skills like getting dressed, getting into bed, climbing stairs or getting in and out of a car. Putting toys away and navigating around objects in the classroom and on the playground on different slopes and surfaces. Gross motor abilities also influence other everyday functions. For example, a child's ability to maintain appropriate tabletop posture (upper body support) will affect their ability to participate in fine motor skills like writing and craft, cutting paper etc. Also sitting upright with good back posture to listen to the teacher's instructions, which in turn has a direct impact on their future learning.

The two trapezoidal shape platforms (pictured as a hexagon) are only 150mm high, which makes an excellent riser for infants. You can easily add more risers together to create a larger platform. The Incline Ramp is nice and wide with a gentle slope for infants to learn on. The Log Crawler provides a more challenging experience as infant's progress. With smooth dowels stretched across a curved ramp, the log crawler is one of the favourites. The Burrow with peepholes creates a small tunnel for children to develop spatial awareness.

Outdorable Toddler Play Package

Order# 16500

Smooth rounded bevel edges

This collection of climbers and challenge planks gives you the essentials to set up a versatile and challenging adventure to encouraging children's physical and mental development. Sound deafening you each day? It is well time you looked at a sound solution for both yours and the students health and well-being. Check out our range of Acoustic panels for all learning environments.

Increase the acoustic performance of your learning spaces

Acoustics

DIY ACOUSTIC PANELS

Increase the acoustic performance of your learning spaces with our new acoustic panels that can be either suspended from ceilings or attached to walls. Five shapes in various sizes to complement the existing interior design. Panels can either be installed on ceilings and walls with supplied hardware. When fixed to a ceiling, adjustable wires allow you to set the suspension height to target multiple frequencies within one classroom.

- Excellent acoustics – 100% recycled glass fibres with excellent absorption values
- Non-flammable – fire class A2 in accordance with DIN EN ISO 1182
- Humidity-resistant – retain their shape with a permanent relative humidity of up to 95% at 30°C
- Available online at learningspacesglobal.com to fit your new or existing spaces
